RUSHIKESH SEEDS JALNA

Quality, Purity & Performance in Every Seed

Introduction

Rushikesh Seeds is an emerging agricultural seed company established in 2022 and headquartered in Jalna, Maharashtra. The company operates in the agricultural sector with a focus on the manufacturing, processing, and packaging of high-quality vegetable seeds and field crop seeds.

With a commitment to supporting farmers and enhancing agricultural productivity, Rushikesh Seeds provides a diverse range of seeds developed to meet the requirements of modern farming practices. The company follows quality-focused processes in seed selection, processing, and packaging to ensure better performance, reliability, and value for farmers.

Driven by innovation, farmer-centric solutions, and sustainable agricultural growth, Rushikesh Seeds aims to become a trusted name in the seed industry by delivering superior-quality products and contributing to the advancement of the agricultural community.

MISSION

To provide high-quality seeds with advanced farming solutions that help farmers improve productivity and achieve sustainable agricultural growth.

VISION

To become a trusted and leading seed company by delivering innovative, reliable, and quality agricultural products to farmers.

Key Challenges in Seed Manufacturing & Agri-Input Industry

Maintaining Seed Quality & Genetic Purity

Ensuring consistent quality, high germination rates, and genetic purity during seed processing and packaging is a major challenge. Strict quality control is required to maintain farmer trust and product reliability.

Building Strong Farmer Reach & Market Awareness

Reaching farmers across rural and semi-urban regions requires effective awareness programs, dealer networks, and market expansion strategies to increase adoption of quality seeds.

Efficient Distribution & Supply Chain Management

Managing timely availability of seeds across different locations while handling seasonal demand fluctuations, storage requirements, and logistics challenges is essential for smooth operations.

Seasonal Demand & Inventory Management

Seed demand varies according to crop cycles and seasons. Maintaining adequate inventory while avoiding wastage and ensuring timely supply remains a key operational challenge.

Solutions for Hybrid Vegetable Seed Business

High-Quality Seed Production & Processing

We follow advanced seed production and processing practices with strict quality control measures to ensure high germination rate, genetic purity, and consistent performance of vegetable and field crop seeds.

Farmer-Centric Approach & Strong Partnerships

We focus on building long-term relationships with farmers by providing quality seeds, agricultural guidance, and reliable solutions to improve crop productivity and support better farming outcomes.

Strong Dealer & Distribution Network

We are developing an efficient dealer and distributor network to ensure timely availability of seeds across different regions and provide easy access to quality agricultural inputs for farmers.

Quality Assurance & Seed Purity Control

Every seed batch undergoes proper quality checks, testing, and verification processes to maintain purity, reliability, and compliance with industry standards.

Modern Packaging & Safe Storage

We use proper packaging and storage methods to protect seed quality, maintain shelf life, and ensure safe transportation while preserving seed performance until it reaches farmers.

Our Offerings

1. Quality Seeds

High-quality vegetable and field crop seeds with better germination, purity, and performance.

2. Seed Production & Processing

Scientific production, cleaning, grading, and processing to ensure consistent seed quality.

3. Packaging Solutions

Quality packaging for safe storage, protection, and extended seed shelf life.

4. Farmer Support & Guidance

Providing crop guidance and quality seeds to improve farmer productivity.

5. Wide Distribution Network

Strong dealer and distributor network for timely seed availability across regions.

Value added

- *High Germination & Seed Purity*
- *Improved Crop Productivity*
- *Trusted Quality Agricultural Inputs*
- *Better Farmer Satisfaction*
- *Sustainable Agricultural Growth*

Expertise

- *Seed Production & Processing*
- *Quality Control & Testing*
- *Modern Packaging Practices*
- *Farmer-Centric Approach*
- *Reliable & Scalable Operations*

Key Distinctions: Our USP

High-Quality Seed Production

Focus on producing premium vegetable and field crop seeds with high germination rate, genetic purity, and reliable performance.

Advanced Processing & Quality Control

Scientific seed processing, grading, and testing practices ensure consistent quality and better crop results.

Farmer-Centric Solutions

Providing quality seeds, guidance, and support to help farmers improve productivity and achieve better yields.

Reliable Packaging & Distribution

Efficient packaging and distribution systems ensure safe storage, longer shelf life, and timely availability of seeds.

Market Size

Global Market

The seeds market size has grown strongly in recent years. It will grow from **$74.13 billion** in 2025 to **$78.44 billion** in 2026 at a compound annual growth rate (CAGR) of **5.8%**.

India Market

The seed industry in India was valued at **USD 8.6 Billion** in 2025 and is projected to reach **USD 20.2 Billion** by 2034, exhibiting a compound annual growth rate of **9.68%** during the forecast period 2026-2034.

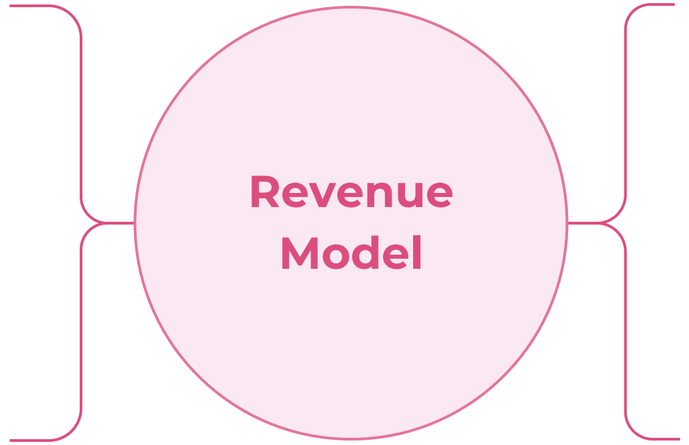

Competitive Landscape

Competitor	Product Range	Market Presence	Key Strengths	Competitive Advantage
Mahyco Seeds	Vegetable & field crop seeds	Pan India	Strong R&D and brand reputation	Advanced hybrid seed varieties
Namdhari Seeds	Vegetable seeds	National & International	Expertise in vegetable seed breeding	High-quality vegetable seed solutions
Rasi Seeds	Field crops & hybrid seeds	Pan India	Strong farmer network	Reliable crop productivity solutions
Advanta Seeds	Hybrid seeds & crop solutions	Global presence	Research-driven seed development	Innovative seed technology
JK Agri Genetics	Vegetable & agricultural seeds	India-wide	Quality-focused seed portfolio	Strong product diversification

Revenue Model

Quality Seed Sales
Core revenue generated through the sale of high-quality vegetable seeds and field crop seeds to farmers, dealers, and distributors.

Value-Added Services
Additional revenue through farmer support, crop guidance, and customized agricultural solutions to improve productivity.

Bulk Orders & Distribution
Revenue from bulk supply of seeds to dealers, distributors, agricultural networks, and farming communities across different regions.

Seed Processing & Packaging Services
Income generated through seed cleaning, grading, processing, and packaging services while maintaining quality and purity standards.

A balanced revenue model combining quality seed sales, distribution expansion, processing services, and farmer-focused solutions to achieve sustainable growth and profitability.

Go To Market Strategy

	Brand Awareness Campaigns	Strategic Partnerships	Customer Acquisition & Retention
Core Activities	• Promote quality seeds through digital marketing and farmer outreach programs.	• Partner with dealers, distributors, and agricultural networks for market expansion.	• Provide quality seeds, timely supply, and farmer support for long-term relationships.
Enablers	• Use social media, farm events, and local networks to increase brand awareness.	• Collaborate with agri-organizations to ensure quality and reliable supply.	• Focus on customer service, easy availability, and consistent product quality.

Aim To Scale Up Plan

Market Expansion

Expand market presence across India by strengthening dealer networks and reaching more farmers with quality vegetable and field crop seeds.

1

Brand & Farmer Growth

Build a trusted brand through farmer engagement, field demonstrations, awareness programs, and strong customer relationships.

2

Processing & Supply Chain Upgrade

Improve seed processing, grading, packaging, and storage facilities to ensure consistent quality and timely supply.

3

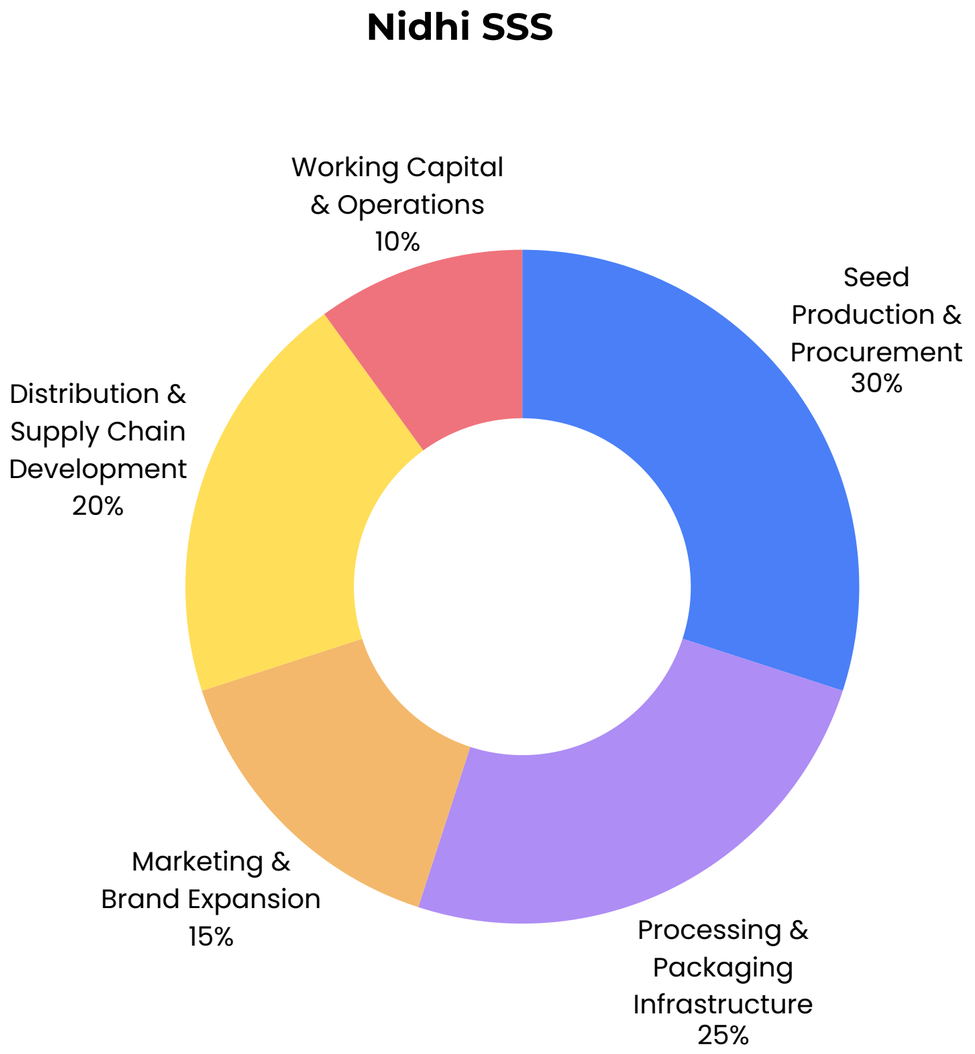

Production Network Growth

Increase seed production capacity while maintaining high genetic purity, quality standards, and efficient operations through better infrastructure and technology.

4

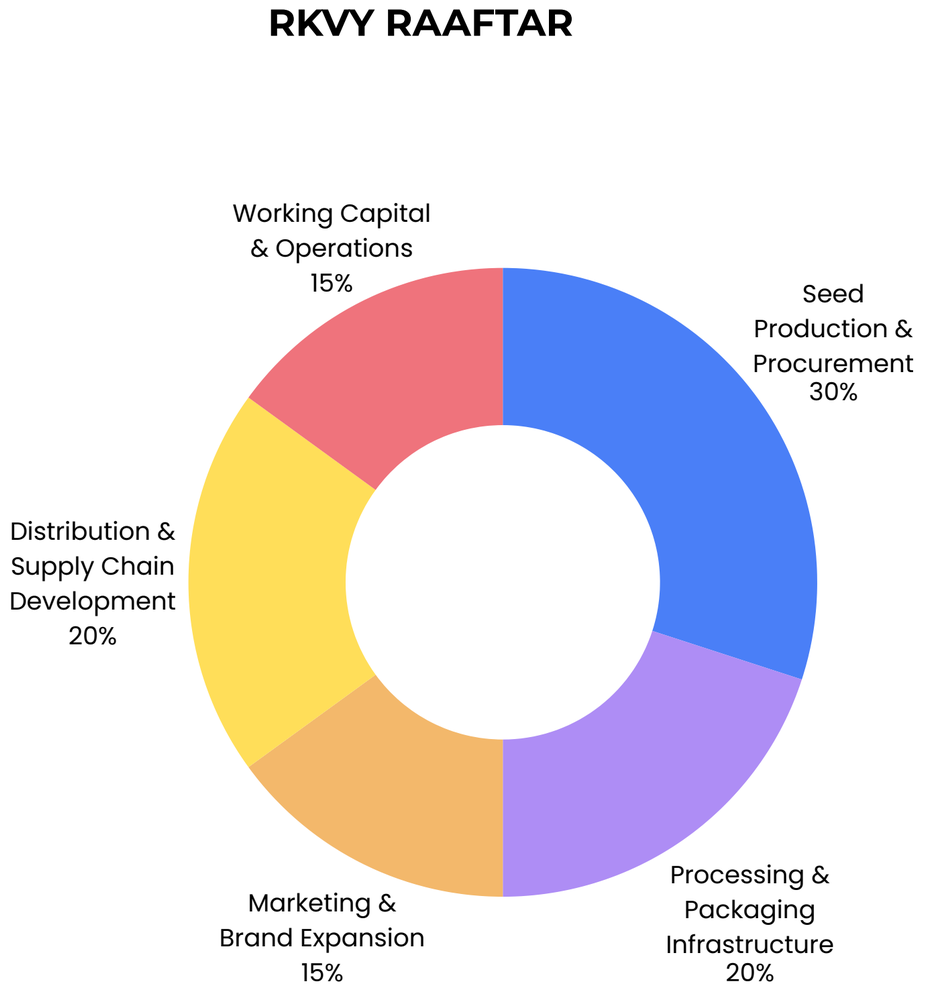

Fund Utilization

Utilization Area	Percentage (%)

Leadership Team

Mr. Ajit Anil Khot

Director

Ajit Anil Khot is a qualified professional with a Master's degree in Genetics and Plant Breeding, bringing strong technical knowledge in seed science, crop improvement, and agricultural practices. His academic expertise supports the development and management of quality seed production processes.

With **5 years** of experience in the seed industry, he has gained practical exposure to seed production, processing, quality management, and agricultural operations. His experience contributes to maintaining seed quality, improving productivity, and implementing efficient farming solutions.

As a key member of Rushikesh Seeds, Ajit Anil Khot plays an important role in driving business growth through technical expertise, quality-focused practices, and farmer-centric approaches. His knowledge in genetics and plant breeding strengthens the company's vision of delivering reliable and high-quality vegetable and field crop seeds to farmers.
